

WHEN A STROKE OCCURS, SECONDS COUNT.

COUNT ON OUR STROKE TEAM
for immediate access to lifesaving care.

St. James Parish Hospital emergency personnel evaluate a stroke patient, as the neurologist visually assesses the patient from a remote location.

St. James Parish Hospital has teamed with Ochsner Medical Center's Telestroke Network, to now provide immediate emergency care of stroke patients - right here at home.

This advanced technology consists of a computer-like monitor with a camera, remotely linked – **24 hours a day, 7 days a week** – to a neurologist with Oschner Medical who can interact with our emergency personnel, as well as the patient, to immediately assess, diagnose and deliver treatment orders.

The faster a stroke victim receives emergency medical treatment, the better the chances for recovery. This new technology gives our patients the best possible chance for effective treatment following a stroke.

When seconds count, you can count on us.

SIGNS & SYMPTOMS OF STROKE:

- Sudden numbness
- Weakness in the face
- Weakness in the arm or leg
- Sudden confusion
- Trouble speaking
- Blurred vision
- Dizziness
- Severe, sudden headache
